SUMMARY

Data and Analytics Engineer with 5+ years of experience in manual ETL, data migration, Python, and SQL. Led migrations for 7 software modules and 11 lab machines, achieving 95% data accuracy. Built automated data quality checks on AWS maintaining >99% data integrity. Experienced in dashboards and client-facing requirements gathering. Collaborated with cross-functional teams across Vietnam and India to align on project requirements and ensure seamless delivery. Based in Malaysia. Open to relocation for the right role, subject to visa sponsorship.

PROFESSIONAL EXPERIENCE

ENGINEER (DATA & QUALITY ASSURANCE)

Kuala Lumpur, MY

Payment Network Malaysia (PayNet)

June 2025 – March 2026

Harmony MyDebit & DuitNow

- Owned data quality end-to-end. Built automated validation rules and regression testing suites, maintaining >99% data integrity and reducing bug detection from 4 hours to 15 minutes.
- Built and optimized ETL pipelines using Python, Excel, and AWS (S3, Athena), reducing manual processing effort and improving pipeline reliability.
- Unified cross-product attributes and configurations into a centralized, single source of truth, standardizing settlement reporting for MyDebit and Duitnow product lines.
- Partnered with engineers to design test cases and validate outputs pre-production. Standardizing team documentation to accelerate onboarding and cross-functional collaboration.

PYTHON DEVELOPER & SYSTEM SUPPORT

Petaling Jaya, MY

Clicque Technology

April 2021 – April 2024

General Hospital Lab Information Management System

- Led data migration for 7 laboratory sub-modules using Python, SQL, and REST API. Tracked progress in Excel, provided client-facing insights, and delivered a seamless transition.
- Integrated 11 lab machines via Python for data transfer and mapping. Achieved 95% accuracy, passed UAT for each machine, and used GitHub & JIRA for transparent collaboration.
- Consolidated audit log requirements across 3 client workflows. Identified commonalities to streamline development. Minimized user workflow time from hours into seconds and passed UAT.
- Orchestrated end-to-end Root Cause Analysis (RCA) and resolved bugs proactively using Excel and JIRA for issue tracking. Maintained clear communication between clients and development team, achieving 95% timely resolution.

FRONTEND DEVELOPER

Kuala Lumpur, MY

Fristor Technologies

Sept 2020 – April 2021

Baby Delivery Tracking System

- Built a high-performance mobile UI for a baby delivery tracking system using HTML, CSS, and JavaScript. Enhanced data tracking procedures and reduced hospital workflow errors by 70%.
- Authored requirements documentation including detailed cost breakdown analysis using Excel and Word. Ensured project alignment and stakeholder satisfaction.

MACHINE LEARNING ENGINEER

Saratix

Kuala Lumpur, MY

Nov 2019 – July 2020

Human Posture Recognition

- Led an initiative in data collection and annotation for real-life image data. Successfully implementing Detectron2 to enhance computer vision accuracy for optimal T-shirt size recommendations. Secured partnership with a local university to develop the recommendation system.
- Completed an intensive 2-month training program in Machine Learning and Deep Learning. Gained skills that directly contributed to innovative and effective solutions in real-world projects.

EDUCATION

International Islamic University Malaysia

Master of Computer Science

Kuala Lumpur, MY

May 2018

Thesis: *Evolutionary Deep Belief Networks with Bootstrap Sampling for Imbalanced Class Data*

International Islamic University Malaysia

Bachelor of Computer Science

Kuala Lumpur, MY

May 2015

FYP: *Predicting the Protein Localization Sites Using Back Propagation Algorithm*

SKILLS

- **Data Analytics & Visualization:** Data Analysis, Root Cause Analysis (RCA), Process Automation, Data Integrity, Financial Data Analysis, Business Intelligence (BI), UAT & Go-live cycles.
- **Languages & Tools:** SQL, Python (Pandas, NumPy), Excel, Tableau.
- **ETL & Automation:** Manual ETL optimization, data mapping & validation, automated reporting.
- **Cloud & Databases:** AWS (S3, Glue, Lambda, Athena), MySQL, SQL Server.
- **Soft Skills:** Stakeholder Management, Cross-functional Collaboration, Process Improvement.
- **Project & Tracking:** JIRA, Git, GitHub, Agile Methodology.

CERTIFICATIONS

HackerRank SQL (Basic) Certification – Issued: 2024

- Demonstrated expertise in SQL queries, data manipulation, and database operations, ensuring efficient data retrieval and management.
- Proficient in advanced SQL concepts, including JOINS, filtering, sorting, and aggregate functions for complex data analysis.

HackerRank Python (Basic) Certification – Issued: 2024

- Assessed on core Python fundamentals, including data types, control flow, loops, functions, and error handling.
- Proven capability to write clean, efficient, and well-structured code for solving real-world programming challenges.

Python for Data Science – IIUM – Issued: 2020

- Completed comprehensive training on Python libraries such as Pandas, NumPy, and Matplotlib for data analysis and visualization.
