SUMMARY

Data and Analytics Engineer with 5+ years of experience in Python, SQL, manual ETL and data analysis. Led data migrations for 7 software modules and 11 lab machines, achieving 98% data accuracy. Built automated data quality checks on AWS maintaining >99% data integrity. Experienced in dashboards and client-facing requirements gathering. Collaborated with cross-functional teams across Vietnam and India to align on project requirements and ensure seamless delivery. Based in Malaysia. Open to relocation, subject to visa sponsorship.

PROFESSIONAL EXPERIENCE

ENGINEER (DATA & QUALITY ASSURANCE)

Payment Network Malaysia (PayNet)

Harmony MyDebit & DuitNow

Kuala Lumpur, MY

June 2025 – March 2026

- Owned automated data quality checks & data integrity assurance, maintaining >99% data integrity and reducing bug detection from 4 hours to 15 minutes.
- Optimized ETL pipelines for analytics & reporting infrastructure using Python, Excel, and AWS (S3, Athena), reducing manual processing effort and improving pipeline reliability.
- Unified cross-product attributes and configurations into a centralized, single source of truth, standardizing financial reporting for MyDebit and Duitnow product lines.
- Partnered with engineers to design test cases and validate outputs pre-production. Standardizing team documentation to accelerate onboarding and cross-functional collaboration.

PYTHON DEVELOPER & SYSTEM SUPPORT

Clicque Technology

General Hospital Lab Information Management System

Petaling Jaya, MY

April 2021 – April 2024

- Led data migration for 7 laboratory sub-modules using Python, SQL, and REST API. Tracked progress in Excel, provided stakeholder reporting and data storytelling.
- Integrated 11 lab machines via Python for data transfer and mapping. Achieved 95% accuracy, passed UAT for each machine, and used GitHub & JIRA for transparent collaboration.
- Consolidated audit log requirements across 3 client workflows. Identified commonalities to streamline development. Minimized user workflow time from hours into seconds and passed UAT.
- Orchestrated end-to-end Root Cause Analysis (RCA) and resolved bugs proactively using Excel and JIRA for issue tracking. Maintained clear communication between clients and development team, achieving 95% timely resolution.

FRONTEND DEVELOPER

Fristor Technologies

Baby Delivery Tracking System

Kuala Lumpur, MY

Sept 2020 – April 2021

- Built a high-performance mobile UI for a baby delivery tracking system using HTML, CSS, and JavaScript. Enhanced data tracking procedures and reduced hospital workflow errors by 70%.
- Authored requirements documentation including detailed cost breakdown analysis using Excel and Word. Ensured project alignment and stakeholder satisfaction.

MACHINE LEARNING ENGINEER

Saratix

Kuala Lumpur, MY

Nov 2019 – July 2020

Human Posture Recognition

- Led an initiative in data collection and annotation for real-life image data. Successfully implementing Detectron2 to enhance computer vision accuracy for optimal T-shirt size recommendations. Secured partnership with a local university to develop the recommendation system.
- Completed an intensive 2-month training program in Machine Learning and Deep Learning. Gained skills that directly contributed to innovative and effective solutions in real-world projects.

EDUCATION

International Islamic University Malaysia

Master of Computer Science

Kuala Lumpur, MY

May 2018

Thesis: *Evolutionary Deep Belief Networks with Bootstrap Sampling for Imbalanced Class Data*

International Islamic University Malaysia

Bachelor of Computer Science

Kuala Lumpur, MY

May 2015

FYP: *Predicting the Protein Localization Sites Using Back Propagation Algorithm*

SKILLS

- **Data Analytics & Visualization:** Data Analysis, Root Cause Analysis (RCA), Process Automation, Data Integrity, Financial Data Analysis, Business Intelligence (BI), UAT & Go-live cycles.
- **Languages & Tools:** SQL, Python (Pandas, NumPy), Excel, Tableau
- **ETL & Automation:** Apache Airflow, Terraform, Manual ETL optimization, data mapping & validation, automated reporting.
- **Cloud & Databases:** AWS (S3, Glue, Lambda, Athena, QuickSight), MySQL, SQL Server.
- **Soft Skills:** Stakeholder Management, Cross-functional Collaboration, Process Improvement.
- **Project & Tracking:** JIRA, Git, GitHub, Agile Methodology.
- **Certifications:** Hackerrank SQL (Basic) 2024, Hackerrank Python (Basic) 2024, Python for Data Science 2020

PROJECTS

HR SaaS Product Analytics

- **Task:** Built an end-to-end SaaS analytics pipeline (SQL/Python) across a 180-company relational dataset, covering churn, MRR/ARR, cohort retention, and funnel analysis.
- **Key skills:** Subscription & Churn Analysis, Funnel Analysis, Cohort Retention Analysis, CSAT Analysis, MRR/ARR Tracking, Feature Adoption & Engagement Analysis

Marketplace Analytics

- **Task:** Simulated a phased, multi-region initiative rollout; applied difference-in-differences analysis with held-out control markets to isolate impact from seasonality, plus seller-segmentation and category-opportunity-sizing frameworks to prioritize next steps
- **Key skills:** Listing Quality Score (LQS) Design, Phased Rollout Impact Analysis (Difference-in-Differences), Seller Segmentation & Adoption Tracking, Category Opportunity Sizing, GMV/Conversion/Return Rate KPI Dashboarding, Regional Funnel & Refund Leakage Analysis
