SUMMARY

Data & Analytics Engineer with 5+ years of experience in Python, SQL, ETL and data analysis looking for analyst role. Led data cleaning, data manipulation and migrations for 7 software modules and 11 lab machines, achieving 99% data accuracy. Built automated data quality checks on AWS maintaining >99% data integrity. Experienced in analysis dashboards and client-facing requirements gathering. Collaborated with cross-functional teams across Vietnam and India to align on project requirements and ensure seamless delivery. Based in Malaysia looking for global opportunities. Open to relocation, subject to visa sponsorship.

PROFESSIONAL EXPERIENCE

ENGINEER (DATA & QUALITY ASSURANCE)

Kuala Lumpur, MY

Payment Network Malaysia (PayNet)

June 2025 – March 2026

Harmony MyDebit & DuitNow

- Owned automated data quality checks & data integrity assurance, maintaining >99% data integrity and reducing bug detection from 4 hours to 15 minutes.
- Optimized ETL pipelines for analytics & reporting infrastructure using Python, Excel, and AWS (S3, Athena), reducing manual processing effort and improving pipeline reliability.
- Unified cross-product attributes and configurations into a centralized, single source of truth, standardizing financial reporting for MyDebit and Duitnow product lines.
- Partnered with engineers to design test cases and validate outputs pre-production. Standardizing team documentation to accelerate onboarding and cross-functional collaboration.

PYTHON DEVELOPER & SYSTEM SUPPORT

Petaling Jaya, MY

Clicque Technology

April 2021 – April 2024

General Hospital Lab Information Management System

- Led data migration for 7 laboratory sub-modules using Python, SQL, and REST API improving the workflow from 2 hours into 5 seconds.
- Integrated 11 lab machines via Python for data transfer and mapping. Transformed manual workflow into instant workflow reducing 3 hours into 2 seconds.
- Consolidated audit log requirements across 3 client workflows and built new feature for product. User workflow time reduced from 2 hours into 3 seconds.
- Performed RCA and resolved bugs. Utilized Excel, Github and JIRA for issue tracking. Maintained clear communication between clients and development team, achieving resolution under 1 hour.

FRONTEND DEVELOPER

Kuala Lumpur, MY

Fristor Technologies

Sept 2020 – April 2021

Baby Delivery Tracking System

- Built a high-performance mobile UI for a baby delivery tracking system using HTML, CSS, and JavaScript. Enhanced data tracking procedures and reduced hospital workflow errors by 70%.
- Authored requirements documentation including detailed cost breakdown analysis using Excel and Word. Ensured project alignment and stakeholder satisfaction.

MACHINE LEARNING ENGINEER

Saratix

Kuala Lumpur, MY

Nov 2019 – July 2020

Human Posture Recognition

- Led an initiative in data collection and annotation for real-life image data. Successfully implementing Detectron2 to enhance computer vision accuracy for optimal T-shirt size recommendations. Secured partnership with a local university to develop the recommendation system.
- Completed an intensive 2-month training program in Machine Learning and Deep Learning. Gained skills that directly contributed to innovative and effective solutions in real-world projects.

PROJECTS

HR SaaS Analysis on In-house Employees and Hiring Candidates Profile

- Built an end-to-end SaaS analytics pipeline (SQL/Python) across a 180-company relational dataset, covering churn analysis, MRR/ARR, cohort retention, and funnel analysis.

OTA Analysis on Marketing, Supply and Pricing model

- Built OTA dashboard streamlining the analysis for supply, marketing and pricing. Identifying supply growth levers, partner growth potentials and marketing channel analysis in one dashboard.

SKILLS & TOOLS

Data Analytics & Visualization: Data Analysis, Root Cause Analysis (RCA), Process Automation, Data Integrity, Financial Data Analysis, Business Intelligence (BI), UAT & Go-live cycles.

Languages & Tools: SQL, Python (Pandas, NumPy), Excel, Tableau, DBeaver

ETL & Automation: Apache Airflow, Terraform, ETL optimization, data mapping & validation, automated reporting.

Cloud & Databases: AWS (S3, Glue, Lambda, Athena, QuickSight), MySQL, SQL Server.

Soft Skills: Stakeholder Management, Cross-functional Collaboration, Process Improvement.

Project & Tracking: JIRA, Git, GitHub, Agile Methodology.

Certifications: Hackerrank SQL (Basic) 2024, Hackerrank Python (Basic) 2024, Python Data Science 2020

EDUCATION

International Islamic University Malaysia

Master of Computer Science

Kuala Lumpur, MY

May 2018

Thesis: *Evolutionary Deep Belief Networks with Bootstrap Sampling for Imbalanced Class Data*

International Islamic University Malaysia

Bachelor of Computer Science

Kuala Lumpur, MY

May 2015

FYP: *Predicting the Protein Localization Sites Using Back Propagation Algorithm*
